

CLEAN ENERGY BOUNTY TREASURE HUNTS

Ahoy, Clean Energy Bounty seekers! Ready for a journey to sustainable riches? Imagine your crew - employees, students, organizational leaders, and more - setting sail to discover the treasures of energy efficiency and cost-savings.

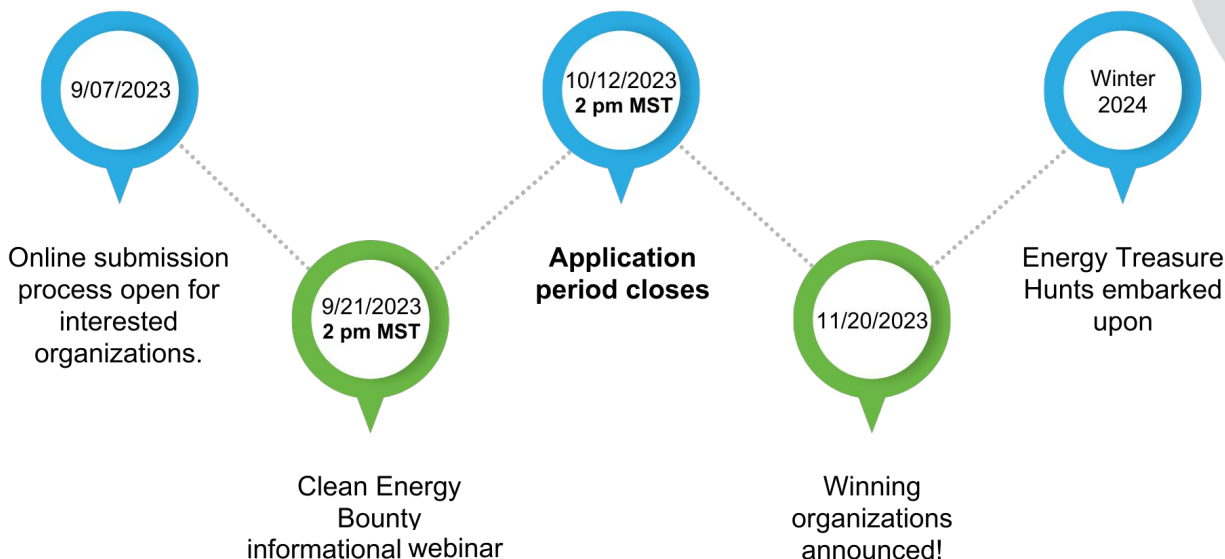

Join us for an Energy Treasure Hunt! Navigate uncharted waters - reveal energy use secrets, analyze cost benefits, and uncover streamlined operations to claim the bounty.

Through the Clean Energy Bounty program, three rural Idaho organizations will participate in energy treasure hunts - **FOR FREE**. Will your organization be one of them? The program includes guidance on securing financial resources for fiscally responsible energy initiatives.

What is an Energy Treasure Hunt?

Teams engage in an energy treasure hunt throughout a building - such as a school, hospital or manufacturing facility - to identify and uncover energy-saving opportunities. **The goal is to locate areas where energy is wasted and to recommend measures to reduce energy consumption and costs.**

Timeline

Private, public, and non-profit organizations are welcome to apply. To participate, organizations must:

- be located in a rural community with a population less than 10,000
- have average power bills totaling at least \$2,000/month

More information about scoring measures and our simple application process can be found at:

CleanEnergyBounty.com

Conducting an Energy Treasure Hunt

1 Preparation & Training

- Form a team of employees, students, volunteers, and/or other stakeholders.
- Learn how to find energy efficiency opportunities.

2 On-Site Treasure Hunt & Data Collection

- Collect data on energy consumption and equipment usage patterns.

3 Recommendation Development & Presentation

- Teams generate and share actionable recommendations to achieve energy and cost-savings.

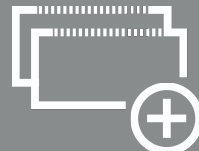

Cost-effective improvements

Enhanced participant energy literacy

Higher likelihood of full & consistent implementation

Easily replicable

Instant results

Beyond the Treasure Hunt...

Organizations will be armed with an implementation plan that includes a prioritized list of projects and clarity on project payback timelines. Warm Springs Consulting will assist in identifying viable finance sources for the prioritized projects.

WARM SPRINGS
Consulting LLC

leads the Clean Energy Bounty program. Team members facilitate the Treasure Hunts and provide expert validation.

Warm Springs Consulting works with high-impact industries and organizations to design win-win-win solutions that increase profit while caring for people and the planet.
